Institutional Distinctiveness

The vision of the institution is "The creation and transfer of knowledge should reflect a profound and complete respect for the dignity of all persons and for the greater common good of humanity. To that end, our vision is to give our society and nation a bunch of skilful engineers and to occupy a place amongst the most eminent institutions of the Nation". For this purpose, the institute is regularly conducting technical activities for encouraging innovation and researches. These activities made students ready for the challenges at the international technical job and research market places.

The world class technocrats are groomed in our campus which are becoming the future of the world, and will be able to face any real world challenges. For the enhancement of professional skills we are mainly focusing on the practical knowledge and we involve our students to learn beyond the syllabus, in this contest we often conduct experiments beyond the syllabus and also we keep our laboratories open beyond the normal working hours to help students excel in their respective discipline of study. We often conduct interaction sessions with the Industry persons as well as with the external eminent professors for the students, where our student get chance of having a face to face interaction with the professionals in view of learning and finding the real need of the current industry, which help them enhancing their technical and social skills, which ultimately meet our mission of our institute. We also conduct regular industrial visits in the view of acquiring real industrial requirements.

Considering engineering as a continuous learning program, the campus is enabled with high speed 24 x 7 hours of internet facility which include both the wired and wireless (Wi-Fi) facility. We also have the ICT enabled class rooms where our students are learning interactively with the help of Audio visual tools.

And can learn the missed topics at home through NPTEL Videos. In this contest we have also associated with NPTEL, for accessing the video lectures, through which our students are learning continuously round the clock. We also conduct different Awareness Camps and Entrepreneurship Faculty Development Programs organize guest lectures, TV programs, Seminars and more. Each Year concerned Departments arrange official visits to industries for the students for their practical knowledge.

We also escort services to the trainees in obtaining approval and execution of their projects in each Year. In these programs our students present both their technical and cultural skills. For this purpose we are conducting regularly the English communication classes as well as the pre-placement training classes for our students. Human values and professional ethics sessions are conducted for educating the students that ensure the practice of ethical values in their profession. As a result of our progressive learning activities, we have recorded a good number of student placements each year and as a result of continuous and innovative learning mechanisms we are getting a good academic result each year. We also promote the student involvement in the entrepreneurship program by our students, for this purpose we conduct Entrepreneurship awareness camps regularly, which have helped our students to establish themselves in the Global competitive market place. The institute aims for a paperless office by providing the IT resources. For this all the departments have well-equipped class rooms with Projector and Wi-Fi enabled.

In the office as well as in exam section we maintained sharing of the resources like printer, scanner even the Photocopier for smooth and effective utilization of the IT resources. The institution frequently updates its IT facilities to provide its students with the best of facilities, like class rooms with projector and audio visual system for creating a live class environment.

We have a Digital Library in side our Central Library which can be accessed through internet and Wi-Fi connectivity with a speed of 70 MBPS. We have two vendors like BSNL and Airtel in our campus. The e-learning resources in the library contains NPTEL videos, NPTEL courses and e-Books, e-journals, CAMU. The entire campus is monitored by 60 numbers of CCTV cameras. The CCTV installed at different places inside the campus including the hostel and canteen. The institute is working continuously for achieving the goals like: Attaining Excellence in Educational quality Producing Pioneering Ideas Professional ethics and Human values Generation of Entrepreneurs in global market. Innovation , research and development activities Structure leadership qualities among our students The Sense of belongingness to the society and the country Being focused and concerned to the mission and the vision of the institute we have recorded increase in the percentage of number of graduates, and also in increase the percentage of number of placed graduates in reputed industries.
